**What is Microsoft Dynamics NAV?**
MS Dynamics NAV is a business solution that is designed for growing small and midsize business. In order to meet company's specific needs both applications can be customized.

**Approaches**
SpeedTeach lets you learn the basics of MS Dynamics NAV online, which is the best solution of optimizing your learning process. Moreover, the course is available in two approaches: Conceptual Approach and Procedural Approach. You can choose one or even both approaches to gain the theoretical, demonstrational and the practical skills you need according to the application's structure (Conceptual Approach) and as a set of business processes with separate business tasks (Procedural Approach).

**Course scope**
Upon completion of this course you will be able to navigate and process company data. You will be able to create and customize solutions in MS Dynamics NAV and work with all application objects.
