Word Reporter for Dynamics NAV

“For the first time I heard my NAV customers saying: what a nice report!”

Reports Made Easy

Word Reporter gives you the capability of using a smart, user friendly, well known tool like Microsoft Word to design the layout

Data and representation level completely decoupled

This simplify the development permitting a double level of optimization, sharing a layout between many data export, and different layout with the same data export

Parallelisation. Data model and layout can be done at the same time by different person, with different skills.

The layout can be designed in disconnected mode.

Customized by End Users

The ease of Microsoft Word gives the opportunity to delegate to end users many customizations.

Microsoft Word is not strictly necessary at run time

Word Reporter is not necessary at run time

Native PDF report generation

Automatic E-mail with attachment

Focus on What You Do Best

We provide also outsourcing opportunities to develop your reports

Give us the layout print and information about the data you want to render out and you'll get back the report.

Fine tuning up to you or even to the end user

Let's Have a Demo
