

ConnectIT

Business Integration Platform

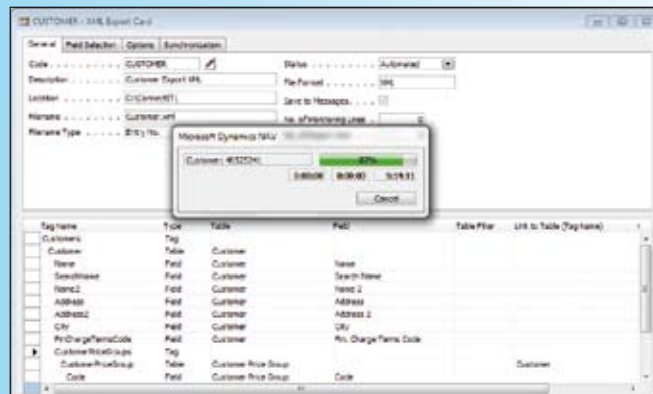

ConnectIT

At a glance:

- Managed from NAV completely
- For customer and consultant
- Export data from Dynamics NAV
- Import data into Dynamics NAV
- Set up for all companies from one company
- Use any known file format (XML, CSV, Excel etc.)
- Use web services (even from version 3.7 and higher), file exchange etc.
- Include business logic
- Plan data exchanges
- Monitor directories
- Automatic execution
- Perform conversions on import/export
- Keep history, etc.

ConnectIT completely opens up Dynamics NAV. Any data from NAV can be exchanged with any other application. This applies to standard NAV, add-on applications and customer specific adjustments.

ConnectIT is user friendly and flexible and requires less bespoke development, bringing down overall costs.

ConnectIT, the easy and flexible way to integrate Dynamics NAV with any other system, using any file format and any transport method.

Business Integration Platform

User Friendly and Flexible

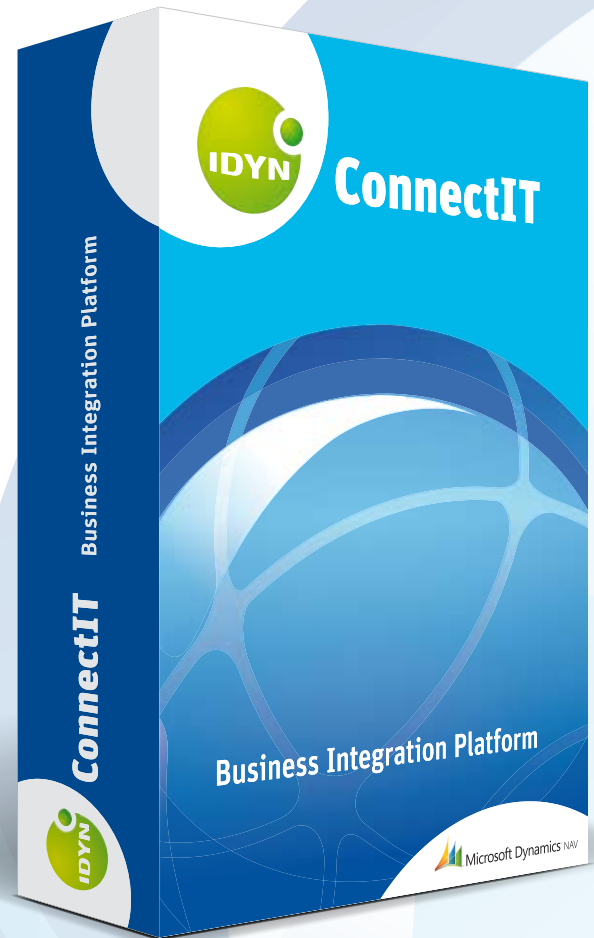

ConnectIT is a user friendly and flexible application that meets all the systems integration requirements you could wish for. Users need no advanced technical knowledge to set up interfaces and systems integration. In fact, an interface can be created in no more than a couple of minutes.

Low Cost and No Bespoke Development

ConnectIT makes systems integration much cheaper than traditional bespoke development. It offers savings on both interface development and maintenance, so that building interfaces is more economically viable and more attractive in more situations. ConnectIT means increased efficiency at a lower overall cost to you.

Use ConnectIT to:

- Match your CRM and ERP systems
- Integrate your e-commerce solution with NAV
- Import information from your HR and payroll systems
- Connect your WMS system with NAV
- Import supplier catalogues
- Get information to and from your mobile devices
- Fuel your Business Intelligence application
- And much more...

"I am really impressed with ConnectIT, the user friendliness of the product and the extensive integration possibilities it offers. I should have had this years ago!"

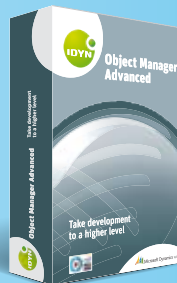

Joris Thielemans, IT Manager Personal Car Lease / Flexlease, Amsterdam, the Netherlands

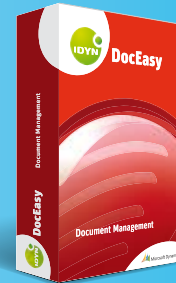

Profitable Add-Ons for Microsoft Dynamics NAV

IDYN offers horizontal add-ons for Microsoft Dynamics NAV, which can be used in any NAV implementation, regardless of any other add-ons or customizations. Our products focus on integration, quality, efficiency and ease of use. They are continuously extended and improved, using partners and customers to deliver input.

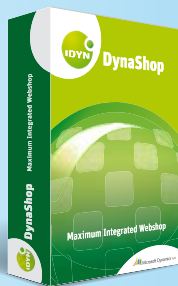

IDYN products are available to all end users through their Dynamics NAV partners. IDYN consultants provide support to NAV partners and their customers regarding the implementation and day-to-day use of the add-ons. We aim to extend our product offerings in response to market requirements.

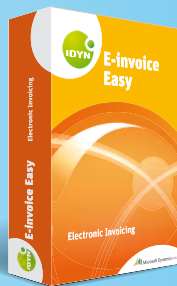

Object Manager Advanced
Take development to a higher level
Keep track of NAV objects you change and update. Combine all modifications in a transport and import them in your customer database.

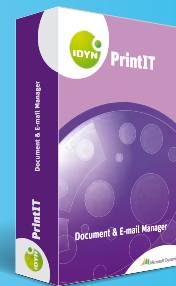

DocEasy
Document management
No more tedious searching for documents. Store everything through Dynamics NAV and retrieve it with ease.

DynaShop
Maximum Integrated Webshop
The fully integrated webshop for Dynamics NAV, including an integration add-on for maximum efficiency and quality.

E-Invoice Easy
Electronic Invoicing
For companies with relatively low invoice volumes who want to take advantage of electronic invoicing nevertheless.

PrintIT
Document & E-mail Manager
Use this handy tool to adjust existing documents in Dynamics NAV with ease. Automatically send order confirmations and invoices by email.
