Streamline & Improve Inventory Control

What is SD Cycle Count

SD Cycle Count allows the end user manage rotational stock checks.

This addon allows items by location and Inventory Group to be stock checked to meet the required count frequency.
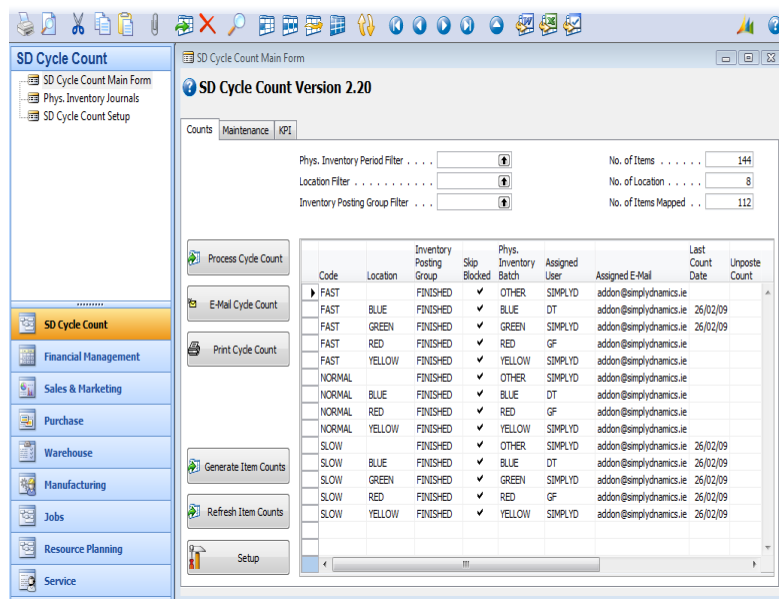

Including:

- E-mail assigned users their count sheets.

- Auto suggest required item counts.

- Key Performance indicators by Location by Inventory Posting Group for any count discrepancies.

- Manage un-posted physical Inventory journals.

Customers can easily deploy this solution and make controlling their inventory on Dynamics NAV simplicity itself.
