

## Ordering app for Dynamics NAV & AX

Mobile order taking on location: supporting your sales force has never been this easy

With its intuitive multi touch interface, Sana Mobile provides an easy entry in the sales supporting capabilities of your B2B sales portal. Quickly take orders, check order status or create new prospects. Sana Mobile delivers full freedom in mobile order taking and combines classic catalogue browsing and ordering with the possibility of quick ordering through filtered order lists. Whether you're using a mobile phone or tablet, the experience is the same.

### Full sales support

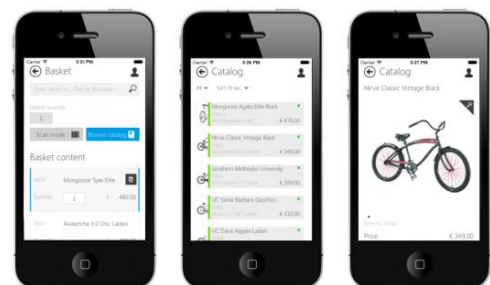

Sana Mobile is the perfect tool for sales agents support. Displayed prices are customer specific, stock indication is up to date, discounts are calculated real-time and exactly the same as if the order was processed from the Dynamics client.

### Boost sales & save time

Sana Mobile delivers tremendous efficiency improvements for the entire sales department, since office hours no longer need to be respected to get accurate information like order history or pending order information. This, combined with the fact that sales agents can represent their customers within the app, is the reason why many sales agents have already chosen to work with Sana Mobile.

### Available anywhere: even without internet

With Sana Mobile, it does not matter whether you are connected to the internet or not. When connected to the internet, all information is available real-time. When you place an order offline, Sana Mobile automatically stores all orders locally on your device so that, with a simple click, all data can be synchronized again when an internet connection is reestablished.

## Quick ordering

Your sales agents can quickly place new orders or check order history. Plus, new prospects can be created. Using the quick order functionality, ordering lists based on filtered product sets speed up the ordering process. Supporting your sales agents on the road has never been this efficient and simple.

## 100% integrated with Dynamics

We know what it takes to get your Microsoft Dynamics NAV or AX up and running, which is why we provide a seamless exchange of your Dynamics business information to your sales portal. Part of Sana is installed within Dynamics and makes sure that your ERP does the calculation of the online shopping cart, real-time.

Customizations and extensions, of any kind, can be met with the Software Development Kit (SDK) available for our partners.

## Multi-device

Whether you are using a smart phone or tablet, the app for Dynamics has it covered. Sana Mobile is available through the app stores of Android and iOS.

## Browse, zoom, swipe and scan

Enriched catalog browsing, multi-touch zoom and swiping complete the unique multi-intuitive experience of using the app. You can use GPS input to determine the customer you are at (geo-based customer selection). Plus, with barcode scanning you can easily add products to the basket. By scanning the barcode, the product is automatically added to the basket.
