Microsoft Navision Attain User Portal

Access Microsoft Navision® Attain – Anytime, Anywhere

Your employees are one of your greatest assets – their productivity (or lack of it) can make or break you. You want them to be more efficient, and you need them to make the right business decisions. The last thing you want is a complicated software system that slows your employees down and grinds your business to a halt.

User Portal helps employees focus on their jobs

There's No Place Like Home

User Portal delivers all the critical information employees need on their own homepage, helping them become more productive. All that's required to access the specific data they need is a Microsoft browser. With User Portal it's easy for your

NAVISION
The Way to Grow

One Desktop – Many Users

Zero Training Time – Zero Training Costs

Like all Microsoft Navision solutions, User Portal has been developed with the user in mind so that it's both intuitive and simple to use. Not only do you save on training costs, your employees can start working immediately. And, there are no extra software costs! User Portal software is complimentary with any

Time Is Money

With User Portal, your employees have a desktop work environment with multiple views into their Microsoft Navision solution, Microsoft Outlook and the Internet, for example. It's all on one screen, meaning that employees always work in the same interface and never have to switch programs. All the critical role-based information they need is on one page so they work more efficiently.

Tailor-Made for Each Employee

Your staff can design and format their own screen content and layout. They can select from assigned Web Parts (or views), such as, ticker stock prices, recent business news and Microsoft Navision Attain.

NAVISION®
The Way to Grow

And it's quick and easy to add to or subtract from the contents of your page to match changing needs. Using, receiving and combining information helps employees manage personal business knowledge effortlessly.

Access with Just One Click

Why waste time searching for the information you need when you can add it to your start page? With the click of the mouse, you can, for example, easily enter orders and look up stock availability.

Give each employee access to e.g. customer information at a click of a button

Knowledge Is Strength

How can you help your employees make better business decisions? You can keep them well informed with the right information they need to do their job effectively. With User Portal, your employees have easy access to all the information that supports the roles they have in your organization. They can quickly and easily initiate searches for relevant role-based information from any source. For example, when a sales representative needs information on customer

accounts and sales history he or she can easily access the relevant and up-to-date information in Sales and Receivables from their User Portal.

The result: Employees have more time to analyze data and are equipped with the right information to solve problems, answer questions and make smarter decisions faster.

Your Staff Excels – Your Business Wins

In the original setup you can decide how much access your employees have to Microsoft Navision Attain, to your intranet, the Internet and to other third-party systems. This helps you ensure that employees remain focused on data relevant to their role and can make better business decisions as a result. Your employees have:

- Single-click access to analytical tools
- Access to real-time integrated data
- The tools they need to deal with sales and service

User Portal comes with support for two preconfigured roles out-of-the-box, but your Microsoft Navision Solution Center can customize your particular solution so that it suits the unique needs of your company.
