Microsoft Navision Attain CRM – Marketing & Sales

Focus on Preferred Customer Segments

Good sales and marketing practices are all about making the right decisions at the right time. And in order to make better business decisions, you need to stay focused and be in control of all marketing and sales efforts.

CRM – Marketing & Sales gives you complete and accurate information so you can focus your interactions on preferred customer segments. You are empowered to:

- Increase your productivity
- Sharpen your competitive edge
- Grow your business

Access Accurate Information

Your employees can access important information on previous sales and marketing campaigns and future opportunities. Within moments you have the answers to such questions as, “When did I last contact Company A?” or “When did Contact B last order?”

Identify Key Accounts

When you have real-time, accurate information on all your contacts, you can make better decisions. You know which accounts need your immediate attention and which accounts can wait. You can even classify customers based on the interrelation or more criteria – specified by you. Your contact and financial

The Way to Grow

information is always accurate, and you can make strategic decisions promptly.

Overview Past and Future Activities

CRM – Marketing & Sales helps your sales staff keep track of and structure sales cycles. You can access exact sales information on each contact at the touch of a button. You gain a clear picture of what is pending in your sales pipeline, and you can adjust your planning accordingly.

Automate Routine Tasks

Not only do your employees provide quality service during every business interaction, they also become more effective because time-consuming processes are automated. You might consider using the automatic update of customers and activities between CRM – Marketing & Sales and Microsoft Outlook.

Plan More Effectively

You improve the hit rate on your sales and marketing campaigns through effective planning. CRM – Marketing & Sales keeps you well informed with real-time, accurate information that's readily accessible. You don't even have to know the exact customer name to retrieve more information on, for example, an opportunity.

Measure Results

You can also measure the overall results of your campaigns. You know how successful a particular

campaign has been, and you can assess your overall company performance.

Understand Your Business

When you have a clear overview of your contact information, you can analyze and understand future demand, and plan accordingly. You can measure the success of your campaigns, and you have the insight you need to identify specific segments and opportunities.

Keep Customers Loyal

Holding on to an existing customer is a lot cheaper than attracting a new one. If you don't keep your customers 100% satisfied, you risk them taking their business elsewhere. Your customers expect a positive, consistent experience.

Personalize Relationships

CRM – Marketing & Sales enables you to identify specific segments in your contact database. You can personalize your approach to contacts – in any language you choose – and concentrate on one-to-one marketing. For example, you can select a particular group of contact for a sales campaign based on past buying behavior.

Make Every Employee a Customer Expert

With CRM – Marketing & Sales, you can provide superior service during every customer interaction. Your employees always have access to accurate and

detailed information on every contact – even e-mails sent between an employee and a contact can be logged in CRM – Marketing & Sales enabling knowledge sharing between employees. Each employee becomes an expert on each and every contact, and you provide your customers with better level of service – time after time.
