

DRAG AND DROP FOR MICROSOFT DYNAMICS NAV 2009 RTC

Drag and Drop for Dynamics NAV 2009 RTC is a horizontal solution that enables drag and drop functionality in NAV's role-tailored client, in order to simplify integration and file transfer with Microsoft Windows and Microsoft Outlook. This feature has been developed as a result of customer demand, with the goal of making the NAV-experience even better.

OVERVIEW

Using Drag and Drop is a cheap and easy way to make Dynamics NAV a more efficient ERP-system. Simply drag and drop important documents on selected pages to make them available to colleagues for later retrieval. Examples include agreements on quotes, product specifications on items, CAD-drawings on projects etc. This saves time and ensures that stored documents are easy to find when needed.

FEATURES

The Drag and Drop box

Add drag and drop functionality almost anywhere in NAV by integrating the Drag and Drop solution, e.g. on sales orders, customer/vendor cards or item cards.

File formats

Drag and Drop accepts all file formats.

E-mails with attachments

Drag and Drop supports emails with attachments from Microsoft Outlook.

KEY BENEFITS

Simple storage of documents thanks to drag and drop functionality.

Save time as all files are stored at a shared location enabling quick and easy access to all dropped files for all NAV users.

Easy to install with the help of the included installation guide.

REQUIREMENTS

Dynamics NAV 2009 RTC

Icecon Affärssystem AB

Icecon Affärssystem AB is a Microsoft Certified Business Solutions Partner with over 15 years of experience in the ERP system Microsoft Dynamics NAV (formerly known as Navision).

Microsoft Dynamics NAV

NAV is an ERP system that contains all the elements that a company needs for its daily operations.

The system is designed in modules and provides each company the opportunity to invest in a system that is customized for them. NAV is tailored after each company's specific needs. The fact that all information is gathered in one central database and the ERP is receiving information from all units within the business, provides unlimited possibilities regarding traceability of transactions.
