

## AVAILABLE TO PROMISE

### B E N E F I T S

Empower your employees to make strategic decisions and provide superior service. New inventory and order management capabilities help ensure the right inventory is available at the right time to meet customer needs and boost profitability.

### Maximize

*your net profit with information that helps you make the most efficient and effective use of inventory.*

Type	Document No.	Customer/Vendor ID	Date	Quantity In	Quantity Out	Balance
SINV	IVCT0018	3M	08/18/2003	Allocated	0.00	2.95
SORD	ORD20020	FWOWI	08/22/2003		4.00	1.20
SRET	IVCT0035	3M	08/24/2003		3.95	0.00
SBKO	BKO10018	3M	08/30/2003		0.00	2.95
PORD	PO0025	100000	09/05/2003		20.00	0.00

### Serve

*customers more effectively by quickly calculating the earliest date inventory can be delivered.*

### Take control of your inventory

Gain complete control over your inventory by knowing instantly how much of each product you have on hand, how much is committed, and how much is tied up unnecessarily in transactions that may never take place.

### Give employees what they need

Make it easy for employees to work more productively with critical information such as accurate inventory counts, using running projected inventory balances presented in a clear and accessible manner.

### Exceed customer expectations

Give customers firm promises of when a product is deliverable by clearly seeing existing commitments and eliminating the risk of stock-outs.

### Get a complete view of your stock

Immediately see every unposted transaction for an individual product, whether real or simply anticipated.

### Maximize your net profit

Avoid lost sales, backorders, dead inventory, and poor customer service with information that helps you make the most efficient and effective use of inventory and maximize your company's net profit.

### See the future

Project how sales orders and deliveries are affected by delays and opportunities and revise inventory projections instantly, by drilling down to any transaction and making changes.

## AVAILABLE TO PROMISE | FEATURES LIST

<b>Product Summary</b>	Make strategic inventory decisions with an easy-to-read summary of every possible inventory total related to the item, including future and provisional orders not yet allocated.
<b>Complete Transaction Record</b>	Automated system tracking through Bill of Materials, Sales Order Processing, Purchase Order Processing, and Inventory makes it easy to find every unposted transaction that will affect inventory.
<b>Rolling Inventory Balance</b>	Produce a running project inventory balance with complete statistics on real and projected sales, as well as the sequence of anticipated delivery, to provide the most current information to your customers and employees.
<b>Accurate Promise of Delivery</b>	Show customers and employees the impact of promising immediate delivery if inventory appears to be committed, as well as project how sales orders will be affected if purchase receipts are delayed.
<b>Calculate Earliest Ship Date</b>	Quickly find the earliest date that a specific quantity of stock can be supplied to your customers while still meeting all existing commitments.
<b>Drill-Down and Update</b>	Drill down to any transaction listed and see a revised inventory projection when you amend product quantities or delivery dates.
<b>Full and Seamless Integration</b>	Maintain and enhance your existing inventory database with a solution built on Microsoft® SQL Server™ technologies, designed to mesh seamlessly with other Microsoft Business Solutions applications.
