

FRx® PROFESSIONAL

B E N E F I T S

Master your financial reporting process with Microsoft® Business Solutions for Analytics–FRx® Professional. High-performance capabilities give you comprehensive, highly customizable financial and management reports that are easy to create, distribute, and use.

Create reports

using a “building block” approach that helps ensure each report is built to meet your specific needs.

The spreadsheet

look and feel makes it easy for anyone with appropriate access privileges to create customized reports.

Finished FRx

reports are presentation-quality, with drill-down capabilities that let you pinpoint detailed information.

Build custom reports

Piece reports together using a “building block” approach that facilitates easy design and maintenance and helps ensure each report communicates the right information.

Create presentation-quality reports

Design presentation-quality reports by defining formatting and fonts directly in the report building blocks.

Reduce administrative work

Automated report processing and distribution capabilities reduce the time employees spend on administrative work, freeing them to analyze information and make informed, strategic decisions.

Simplify the report building process

The spreadsheet look and feel allows anyone with appropriate access privileges, from the CEO to the marketing analyst, to create customized reports quickly and easily—no programming degree required.

Maintain reports seamlessly

Tight integration with Microsoft Business Solutions–Great Plains® eliminates the otherwise error-prone and time-consuming processes for updating and maintaining reports.

Enhance corporate communications

Use multiple report formats and distribution techniques to ensure the right financial information is being delivered to the right people.

Access reports securely

Establish custom security settings to ensure information is accessed only by users who have secure access rights.

Reduce server usage

Schedule reports to run at off-peak hours so generation and distribution of large reports have minimal impact on server resources.

FRx PROFESSIONAL | FEATURES LIST

Custom Report Design	Use a “building block” approach to design reports, defining the rows and columns that will appear with a reporting tree that establishes the relationship between reporting units.
Familiar Spreadsheet Interface	Use FRx to create intelligent financial statements, leveraging its spreadsheet features and tight integration with the Great Plains account and database structure.
Top Level Report Analysis	Achieve superior report analysis by consolidating information from multiple companies and data sources—including un-posted transactions or base period referencing—or by creating custom report relationships.
Sophisticated Calculations	Implement mathematics and if/then logic to incorporate complex calculations into your reports.
Report Relationship Customization	Create new reporting relationships by changing the reporting structure, without affecting data entry processes or rearranging account segments in the general ledger.
Bottom-Level Report Analysis	Use the FRx DrillDown Viewer to analyze information from summary level information all the way down to transaction level detail.
Multiple Report Formats	View reports on the screen and drill down into underlying data. Print reports for presentations, e-mail them for easy distribution, or export them to spreadsheets for additional analysis.
Web-Based Reports	Publish, store, manage, and enable online administration of reports in a secure Intranet or Internet environment using FRx WebView, while maintaining drill-down and printing functionality.
Custom Security Settings	Set security by Reporting Tree level to ensure information is accessed by only those users that have the right permission settings.
Currency Translation	Use the FRx Currency Translator to seamlessly translate currency across multiple accounting systems. Use the Currency Rate Maintenance Wizard to quickly set up currency exchange rate tables with information pulled from the general ledger.
Automate Report Delivery and Production	Use the FRx Report Server to automate the production and distribution of reports in a scalable, high-speed reporting environment.
XBRL Support	Create and publish XBRL 1.0 (Extensible Business Reporting Language) compliant reports.
