Google Embedded Maps Connector

**INTEGRATE GOOGLE MAPS AS A PRO IN
YOUR OWN APPLICATIONS**

www.fd-consultancy.be

OUR MISSION

The Google API is a very powerful tool that can present your data in a graphical way. By default, this is all web based in an browser. With the connector this functionality is exposed in an easy way within your own applications.

MAPS

Integrated maps, fully control of markers, route optimization, real-time display of markers, etc...

GEOCODING

Control of an address (correct spelling), reverse geocoding, all with one simple instruction.

OUR VALUE

With a minimum of programming, you can now have one of the most powerful tools in your own application for visualizing various data on google maps.

Now you have a powerful set instructions available that takes care of this ...

Google maps connector

Integrate like a Pro

With google maps connector you seamlessly integrate the enhanced functionality of google maps within your own application.

This can range from simple maps to complex planning tools.

UNPRECEDENTED OPPORTUNITIES !

***Our website contains several examples that
demonstrate how easy it is to use this tool ,
and with a highly professional result.
