Object Manager Light has won the Mibuso "Best Download Award 2009". No less than 41% of the registered votes went to Object Manager Light.

Mibuso.com is a widely recognized knowledge center in the Dynamics world. The award winner was chosen by visitors to the site.

Object Explorer, the cockpit of Object Manager, with much more functionality to manage your objects than NAV's Object Designer.

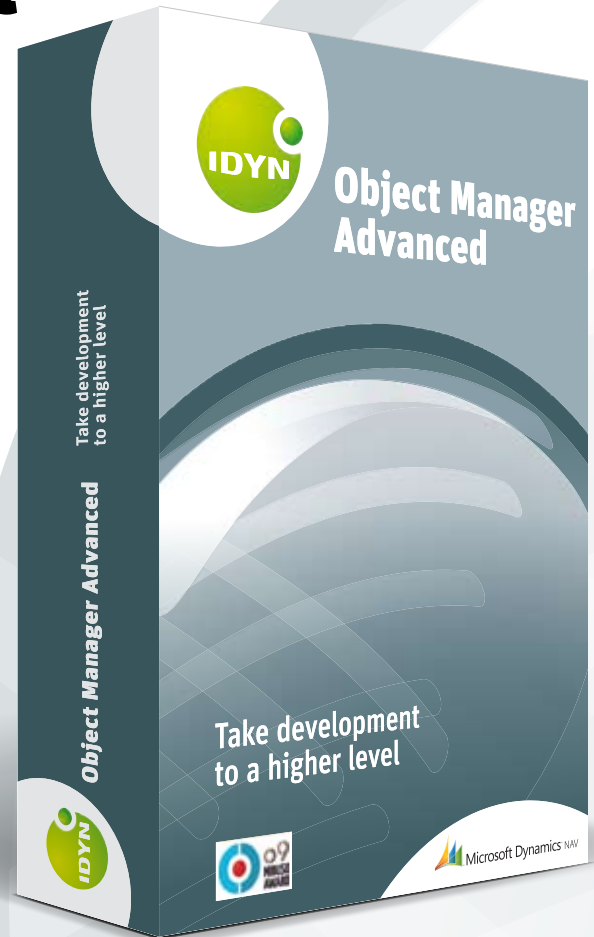

# Take Development to a Higher Level

## **The Object Manager – an outstanding toolkit for developers and consultants**

Keep track of the NAV objects you change and update the version list when you are done. For multiple developers at the same time, if required. Conflicts are easily identified and resolved. Combine all modifications in a transport and use the wizard to import them into your customer database. Safely and with ease. Take advantage of useful utilities, such as where-used functionality, renumber objects, update variables, check guidelines and a translation tool.

## **Using Object Manager means better co-operation, higher quality, lower cost and more satisfied customers**

With Object Manager, time-consuming error and conflict resolution is relegated to the past. Errors and conflicts simply don't occur. As a result, your work is of far higher quality and completed sooner. You will find that much less testing is required and that you no longer need to switch back and forth between development and customer database. In other words, you can work at a lower cost. And the final result? More satisfied customers, opening the door to opportunities for new business.

*"Using IDYN's Object Manager saves us so much time and money, it's really incredible"*

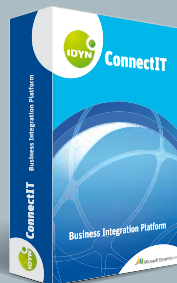

*Hendrik Schröder,  
GOB Software & Systeme, Krefeld, Germany*

# Profitable Add-Ons for Microsoft Dynamics NAV

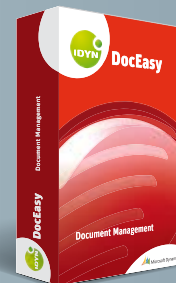

IDYN offers horizontal add-ons for Microsoft Dynamics NAV, which can be used in any NAV implementation, regardless of any other add-ons or customizations. Our products focus on integration, quality, efficiency and ease of use. They are continuously extended and improved, using partners and customers to deliver input.

IDYN products are available to all end users through their Dynamics NAV partners. IDYN consultants provide support to NAV partners and their customers regarding the implementation and day-to-day use of the add-ons. We aim to extend our product offerings in response to market requirements.

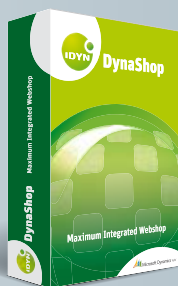

## **ConnectIT** **Business Integration Platform**

ConnectIT is a toolbox for all your integration issues. ConnectIT completely opens up Dynamics NAV.

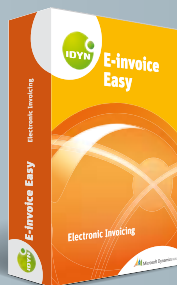

## **DocEasy** **Document management**

No more tedious searching for documents. Store everything through Dynamics NAV and retrieve it with ease.

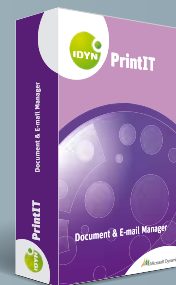

## **DynaShop** **Maximum Integrated Webshop**

The fully integrated webshop for Dynamics NAV, including an integration add-on for maximum efficiency and quality.

## **E-Invoice Easy** **Electronic Invoicing**

For companies with relatively low invoice volumes who want to take advantage of electronic invoicing nevertheless.

## **PrintIT** **Document & E-mail Manager**

Use this handy tool to adjust existing documents in Dynamics NAV with ease. Automatically send order confirmations and invoices by email.
