

## Intelligent Route Planner 8.00 in Microsoft Dynamics NAV

### BENEFITS

- **Reduce costs of your distribution.** Optimizer will help you reduce number of vehicles used for daily deliveries and total driven distance.
- **Delivery scheduling.** *Intelligent Route Planner* will assign customer orders to vehicle routes taking into account factors such as customer access constraints, time windows, truck constraints and driver hours.
- **Manage delivery time.** Routing software enables customers to request delivery times. Delivery time is automatically allocated to routes which are re-optimized to improve utilisation of resources.
- **Static and dynamic scheduling.** Get benefits and flexibility from real-time routing and scheduling system. Our system is able to schedule very large distribution and transport operations in real time.
- **Route Optimization.** *Intelligent Route Planner* is designed to address large, complex vehicle routing problems. The algorithm used in IRP is the holder of two world records in Vehicle Routing Problems registered by worldwide transportation organization SINTEF.

*ANTEI Intelligent Route Planner* is a tool designed to bring advanced intelligent route planning into Microsoft Dynamics NAV. Like NAV itself IRP uses the latest Microsoft technology to bring transport and route planning into the NAV application. This allows transport and delivery planners access to an easy to use planning tool based in NAV which utilises award winning route optimisation algorithms. IRP interacts with Google Maps and Bing Maps to retrieve geo locations for all your customers, locations, the latest distances and timings and visual and written route plans.

Self-L.	D. No.	Type	No.	Description	Quantity	Unit o...	Locat.
C00020	102034	Item	70061	1468L Elka Knife	100	Carton	SILVER
C00020	102035	Item	70061	1468L Elka Knife	50	Carton	SILVER
C00020	102036	Item	70061	1468L Elka Knife	75	Carton	SILVER
C00020	102037	Item	70061	1468L Elka Knife	275	Carton	SILVER
C00020	102037	Item	70061	1468L Elka Knife	12	Carton	SILVER
C00020	102038	Item	70061	1468L Elka Knife	8	Carton	SILVER

The advantage of ANTEI IRP over standalone packages is that it is built into your Microsoft ERP solution and so all data is readily available, making reporting easy and maintaining interfaces between systems unnecessary.

## FEATURES

Role Centres	<ul style="list-style-type: none"> <li>➤ Can be available for any and every role or user.</li> </ul>
Multi Depot Route Planning	<ul style="list-style-type: none"> <li>➤ Automatically schedules deliveries from one or more depots.</li> <li>➤ Flexibility to schedule 1000s of deliveries in seconds.</li> </ul>
Least Cost Routing Algorithm	<ul style="list-style-type: none"> <li>➤ Scheduling and optimization based on customisable criteria and constraints.</li> <li>➤ Driver scheduling takes into account Working Time Directive.</li> <li>➤ Truck routing maps.</li> <li>➤ Geographic cost profiling.</li> <li>➤ Vehicle routing cost per km/mile and per hour.</li> </ul>
Vehicle and Trailer Management	<ul style="list-style-type: none"> <li>➤ Can help choose lowest cost vehicle.</li> <li>➤ Integration with Fixed Assets helps manage vehicles and trailers maintenance and services.</li> <li>➤ Keep track of vehicles and drivers costs by integration with General Ledger and Resources.</li> </ul>
Real-time Planning and Dynamic Scheduling	<ul style="list-style-type: none"> <li>➤ Provides real-time environment for planner and managers who must react dynamically to continuously changing operations.</li> <li>➤ Automated real-time planning of work for vehicles and drivers.</li> <li>➤ Optimal response to cancellations, last minute orders, redirections, etc.</li> </ul>
Home Delivery Scheduling	<ul style="list-style-type: none"> <li>➤ Customer profiles and territories can be optimized at a strategic level.</li> <li>➤ Real-time planning of delivery ensures orders fulfilment efficiency.</li> </ul>
Load Planning	<ul style="list-style-type: none"> <li>➤ Includes sophisticated load planning software which can optimize the trucks load process.</li> <li>➤ Includes factors like objects size, drivers qualifications, preferred loading sequence, multi-dropping, temperature control, etc.</li> </ul>
Multi-Day Trips	<ul style="list-style-type: none"> <li>➤ Supports multiday, international route planning.</li> </ul>
HGV Calculation	<ul style="list-style-type: none"> <li>➤ Includes HGV speed factors.</li> </ul>
Optimisation	<ul style="list-style-type: none"> <li>➤ Allows different types of optimisation:             <ul style="list-style-type: none"> <li>○ number of routes minimisation,</li> <li>○ time minimisation.</li> </ul> </li> </ul>
Collections	<ul style="list-style-type: none"> <li>➤ Antei IRP allows collections planning as well as deliveries.</li> </ul>
Mobile	<ul style="list-style-type: none"> <li>➤ Can be easily integrated with mobile devices</li> </ul>
