

NAVISION XAL®

- Navision XAL version 3.0 is a solution with a new look and greatly enhanced functionality. A number of local versions have been merged into one – meaning that support for international companies has been extended greatly.

What's new in Navision XAL™ 3.0

Improved User Interface

Throughout the system, the user interface has been updated to the latest Windows standards from Microsoft.

- New menu option with tree-structure for improved overview
- Users can choose to work with the well-known matrix menu from earlier versions
- Tabs and grouping of fields on forms and tables to improve information overview and ease-of-use
- Menu commands now also available as buttons on forms for faster and easier access
- Templates to change appearance of individual ledger worksheets
- From a central parameter, a number of fields can be set to show or hide on forms throughout the system

New functionality

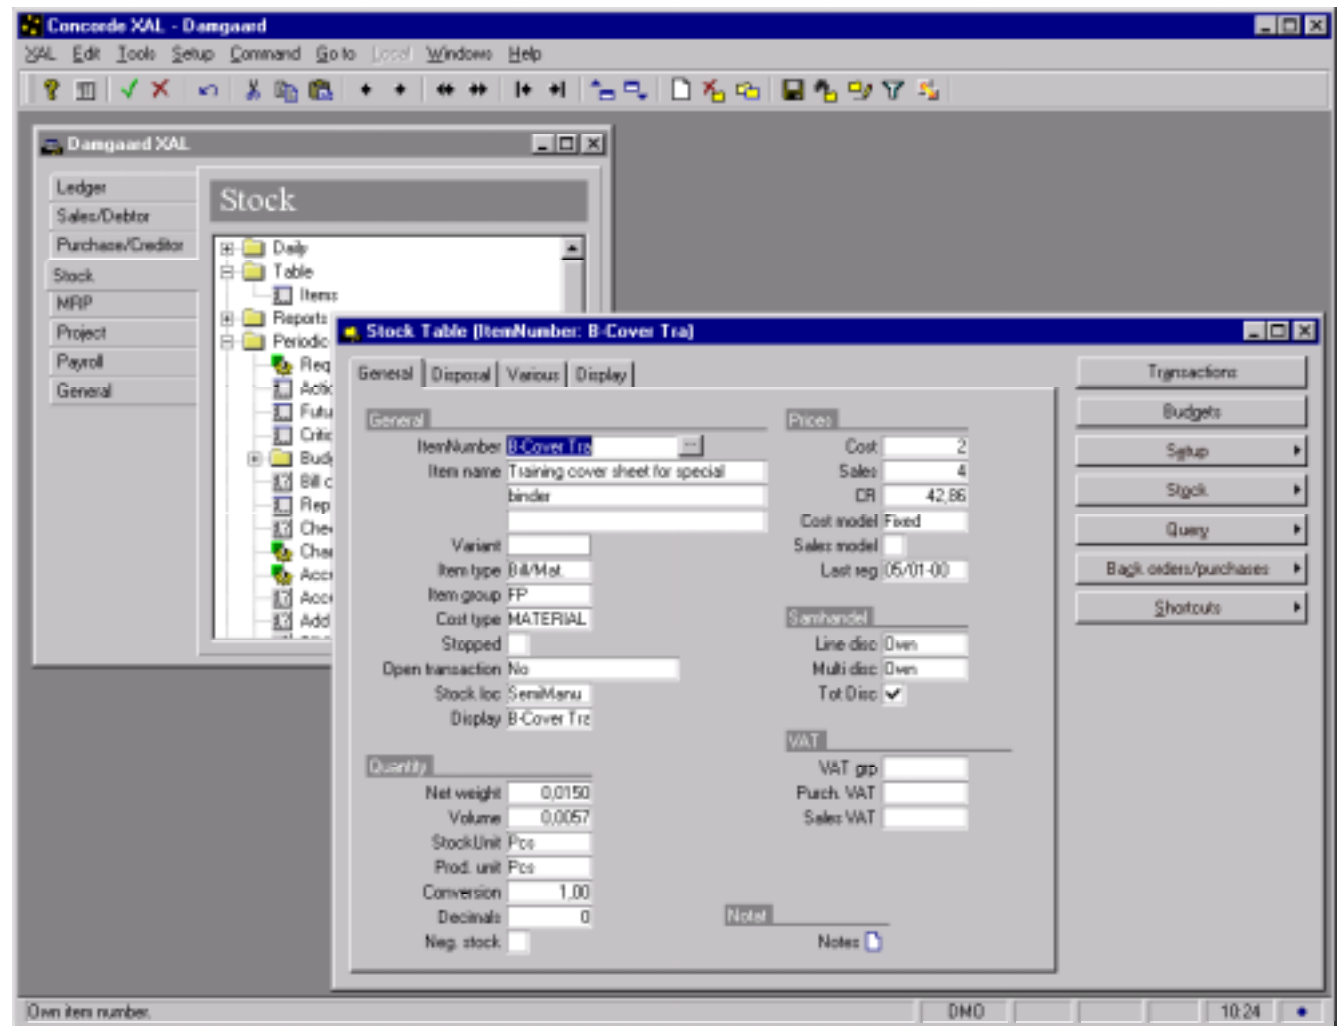

A wealth of new functionality has been added to enhance Navision XAL. Here is a brief overview of the new features:

General Ledger

- Automatic check option to avoid reuse of voucher numbers
- Use of accruals from ledger worksheet
- Differentiated VAT rates on sales and purchase orders

NAVISION®
The Way to Grow

Throughout the system, the user interface has been updated to the latest Windows standards from Microsoft.

Debtor and Creditor

- Quick registration of debtor payments (enter only invoice number)
- Improved credit limit check
- Check facility for previously used creditor invoice numbers
- Automatic check to ensure that a creditor cannot be paid twice, if payments are created in several worksheets simultaneously
- Payments can be booked on a temporary account until they are drawn in the bank (e.g. payments by cheque) – for easier bank account reconciliation

- Book value of delivery notes from sales and purchase orders automatically in ledger for easy access to total value of items in transit in the balance

Stock

- Control flow of items coming into your stock via batch number control in purchase, stock, order, project and MRP
- Select stock model FIFO, LIFO or average cost

NAVISION®
The Way to Grow

E-business

- If you select 'optional' stock model, you are free to select the stock model when running 'costing of cost value' report

One international version

What used to be a number of different country versions have now been united into one international Navision XAL. With 19 different languages available, strong multi-currency handling, the option of running several languages from the same installation and running the same system in companies in different countries, Navision XAL is the perfect choice for an international company.

This is a brief overview of the new functionality to support international companies in version 3.0:

- VAT handling is available for a number of different countries in the same system
- Each user can select which language to use
- Easy consolidation of accounts from subsidiaries in different countries
- With one installation at head office, you can have several sites linked into the same Navision XAL installation, for example, shops in a commercial chain or different production units or warehouses.
