

# b.stock

Pick - Put - Scan

Available on the  
**App Store**

Access, pick and put your inventory directly from your iPhone© or iPod touch© with b.stock.

You don't have to search for a terminal and navigate through several forms anymore, with b.stock you have your whole inventory in your pocket.

Our easy to use user interface enables you to check your inventory uncomplicated and efficient.

Whether you're at your storage location or on the way, b.stock is optimized for the mobile use and can connect to your Microsoft Dynamics NAV 2009© Server from anywhere.

Pick and put your inventory with your iPhone© or iPod touch©.

## "Intelligent pick / put"

Warehouse activity is auto-found by item or serial no. You don't have to scan through a whole warehouse document, just scan an item or serial no. and b.stock finds the matching warehouse activity.

b.stock is the only App that supports Linea Barcode Scanner as well as Microsoft Dynamics NAV.

Combine your iPhone© or iPod touch© with the Linea Pro scanner and scan quickly to your warehouse.

You can scan barcodes to quickly check the inventory for an item, pick or put an item to or from a location.
