# Anveo EDI Connect

All you need is combined in one product

## Four components of Anveo EDI Connect

### EDI SETUP

Definition of data transformation takes place in Microsoft Dynamics NAV.

### ASSISTANT

Automatically detects message structure of EDIFACT, XML and X12.

### CONVERTER

Transform your data directly in Microsoft Dynamics NAV – without the need of external software.

### DATA TRANSFER

Transfer your data to EDI partners and keep control with EDI message control center.

- ✓ Electronic data interchange between business partner.
- ✓ Send and receive business documents.
- ✓ Keep control over your EDI data in Dynamics NAV.
- ✓ Dynamics NAV converter to process any data formats.
- ✓ Inter company posting feature for any documents.

# Message Control Center

Keep your EDI messages under control

The Anveo Control Center clearly shows incoming and outgoing EDI messages.

You will be informed about data transformation problems. Direct links to the corresponding EDI messages helps you solve issues.

**Tailor the Anveo Message Control Center to your needs with the power of Dynamics NAV.**

# EDI Assistant

Automatically create EDI document structure

Save valuable time by extracting the data structure from example files

## **This is unique**

The Anveo EDI Connect setup assistant interprets the EDIFACT, X12 and XML data structure from your example files.

## **All EDIFACT formats/standards are supported**

The message structure is automatically interpreted for UN/EDIFACT formats like D96A. All other formats can be also read by its generic detection.

## **EDI set-up in just a few minutes**

The Anveo EDI Connect assistant significantly reduces your setup time. Define your EDI data structure with just a few mouse-clicks.

# EDI Setup

Simple definition of data transformation realized in Anveo EDI Connect

Anveo EDI Connect is an add-on for Microsoft Dynamics NAV and is fully set up and operated from there. Simply define your data transformations by mouse-click.

**No external converter or additional service provider required to transform XML, EDIFACT and X12 data.**

Microsoft's Dynamics NAV service tier does all data transformations (or the Classic Client).

System requirement is Dynamics NAV 5 or newer (application). Anveo EDI Connect also runs with previous database versions.

# Services

Anveo services configuration and clearing

## Detailed definition of Anveo services

### Configuration

**Setup of data transformations between external message format and the Dynamics NAV data structure using Anveo EDI Connect.**

- Setup of one Anveo EDI mapping
- A detailed data format description of internal and external data format and an example file is required and must be provided to Anveo.
- Communication services (e. g. phone calls/emails with customer or partner) is limited to eight hours.
- Additional services on an hourly basis.

### Clearing

**Ensures data transformations within Anveo EDI Connect.**

- Detect data transformation errors and solve them in case of technical reasons.
- Email notification is sent to the Anveo clearing center in case of errors.
- Update of EDI document type in the case of light data transformation updates.
- Setup and vast updates of data transformation are not part of clearing. These are configuration services.
- Service level: guaranteed start within four hours after receiving an error message at Anveo clearing center during business hours (Mon-Fri, 8am-5pm, CET)  
Fixed time to solve error cannot be guaranteed due to widely differing workload required.
- Other service levels available on request.
