

## Navision Attain Multilanguage

*Navision Attain gives multilingual and global companies a fast way to do business more efficiently.*

### Key Benefits

- Pursue business opportunities more efficiently by communicating in your customers' language
- Help your multilingual employees work more efficiently

## Fact Sheet – Multilanguage

### Break the Language Barrier

The paradox of the new global market is that in order to succeed in it, you must meet local needs. And meeting local needs means that you have to speak the local language – wherever you do business.

With the multilanguage functionality in Navision Solutions, you can respond quickly and efficiently to opportunities, regardless of geographic location. You can switch to virtually any language in the world on the spot.

You pursue global business opportunities more effectively, and your employees work more efficiently, thus improving internal operations.

### Speak Your Customer's Language

When you speak your customer's language, customer service improves because you do business in your customer's language. If Polish customers want invoices in their native language, you can easily print the invoices in Polish from your Navision Attain application.

### Speak Your Employees' Language

Your employees speak different languages. Can your business solution handle it? Navision Attain includes

**NAVISION®**  
*The Way to Grow*

the capability to use different languages within one workplace – or even at the same workstation.

Navision Attain helps employees become more efficient by eliminating language barriers among your multilingual workforce. Employees can work in the language of their choice. For example, a French-speaking manager in Canada can work in his native language even if the local Navision solution is in English.

What's more, you can change languages on the fly. You don't have to close down the application and log on again just to switch languages. The real-time functionality saves you time. It gives you fast access to the information you need – in your own language.

You can even accommodate employees who speak different languages at the same workstation. They can change the language with just one click of the mouse.

### **Take Your Own Language with You**

You also pursue opportunities more efficiently by making it easier to manage global operations. If you need an employee from the head office to run a project in Italy, you can send the employee to your office in Italy. The employee can immediately go to work in his or her own language. No matter where you or your employees are, you can work in your own language.

### **Contact Your Partner**

To learn more about Navision Attain please contact your local Navision Solution Center. They have the

expertise necessary to meet your specific business needs. Or, visit our Web site at [www.navision.com](http://www.navision.com).
