

User Portal

Instantly increases employee productivity

Key Benefits

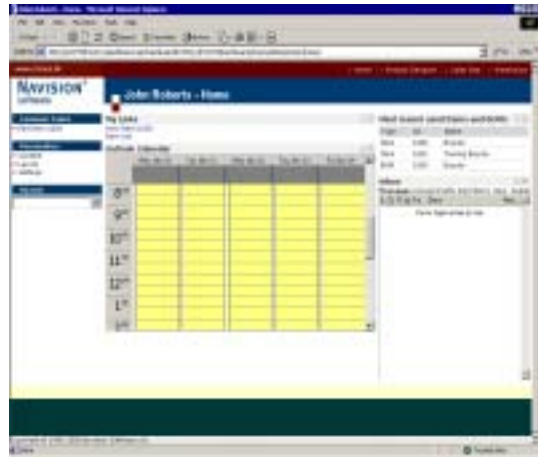

- Helps your company instantly and cost-efficiently deploy a Web-based interface
- Allows employees to improve their efficiency
- Helps employees make better business decisions

Fact Sheet - User Portal

Access Navision® Attain – Anytime, Anywhere, Any Web

Your employees are one of your greatest assets – their productivity (or lack of it) can make or break you. You want them to be more efficient, and you need them to make the right business decisions. The last thing you want is a complicated software system that slows your employees down and grinds your business to a halt.

User Portal helps employees focus on their jobs

There's No Place Like Home

User Portal delivers all the critical information employees need on their own homepage, helping them become more productive. All that's needed is access to a Microsoft browser. With User Portal it's easy for your employees to access data in Navision Attain, no matter where they're working. Remote

NAVISION®
The Way to Grow

users, such as traveling sales representatives, can immediately access their personal homepage.

One Desktop – Many Users

With User Portal, you can provide both casual and regular users of Navision Attain with a personal portal suited to their role in your organization. For example, you may have 20 casual users in your warehouse who need to check orders or inventory in Navision Attain.

With User Portal, one computer serves all. Employees can simply log on to the computer in the warehouse to access their personal homepage – uniquely designed to meet their needs. Once he or she has logged off, the desktop is ready for the next employee.

Zero Training Time – Zero Training Costs

User Portal requires no training. If your employees have worked with a Microsoft program or surfed the Internet, they have all the experience they need.

Like all Navision solutions, User Portal has been developed with the user in mind so that it's both intuitive and simple to use. Not only do you save on training costs, your employees can start working immediately. And, there are no extra software costs! The only extra software you need is a Microsoft browser.

Time Is Money

User Portal saves your employees time by giving them instant access to the information they need to do their job, making them more efficient.

With User Portal, your employees have a desktop work environment with multiple views into their Navision solution, Microsoft Outlook and the Internet, for example. It's all on one screen, meaning that employees always work in the same interface and never have to switch programs. All the critical role-based information they need is on one page so they work more efficiently.

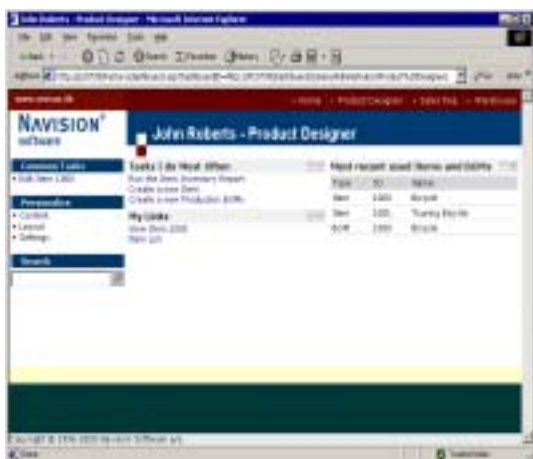

Tailor-Made for Each Employee

Your staff can design and format their own screen content and layout. They can select from assigned Web Parts (or views), such as, ticker stock prices, recent business news and Navision Attain. And it's quick and easy to add to or subtract from the contents of your page to match changing needs. Using, receiving and combining information helps employees manage personal business knowledge effortlessly.

Access with Just One Click

Why waste time searching for the information you need when you can add it to your start page? With the click of the mouse, your stock manager, for example, can easily access vendor accounts, enter orders and look up stock on hand.

NAVISION®
The Way to Grow

Give each employee their own role-based portal

Knowledge Is Strength

How can you help your employees make better business decisions? You can keep them well informed with the right information. With User Portal, your employees have easy access to all the information that supports the roles they have in your organization. They can quickly and easily initiate searches for relevant role-based information from any source. For example, when a sales representative needs information on customer accounts and sales history he or she can easily access the relevant and up-to-date information in Sales and Receivables from their User Portal.

The result: Employees have more time to analyze data and are equipped with the right information to solve problems, answer questions and make smarter decisions faster.

Your Staff Excels – Your Business Wins

In the original setup you can decide how much access your employees have to Navision Attain, to your intranet, the Internet and to other third-party systems. This helps you ensure that employees remain focused on data relevant to their role and can make better business decisions as a result.

Your employees have:

- Single-click access to analytical tools
- Access to real-time integrated data
- The tools they need to deal with sales and service
