- ▶ Automatic information recognition
- ▶ Line item extraction
- ▶ Multipage & attachment support
- ▶ Seamless validation
- ▶ Integrated document viewer
- ▶ Invoice approval workflow
- ▶ Credit note mgt.
- ▶ Integrated archiving.

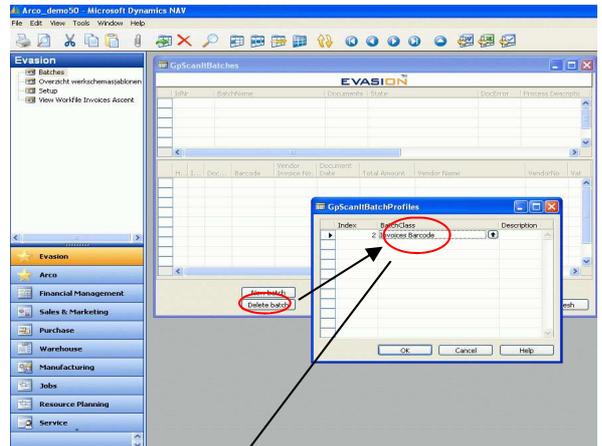

## Creating the paperless office!

Truly integrated document management for impressive productivity gains! Integrated scanning, powerful information extraction, workflow supported validation and digital archiving of all your inbound and outbound commercial documents from within your Microsoft Dynamics NAV environment! Evasion for Navision is the comprehensive and affordable solution that relegates time consuming paper handling to the past.

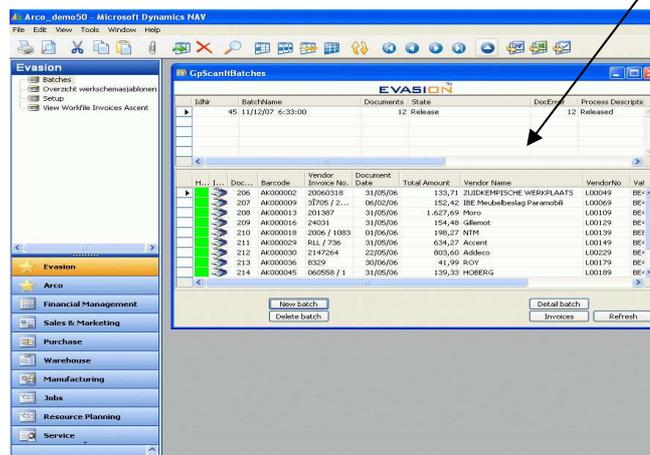

## A comprehensive solution.

### Integrated Scan Management

Integrated scan management supports an unlimited number of scan batches and document types. Direct support of scanner, OCR and extraction software through an intuitive interface that requires no specific skill. Transparent processing of multi-page documents and attachments. No technical skills nor steep learning curves required!

### Seamless validation

Seamless validation through a 'management by exception' interface. Only those documents that require your **attention** need validation. Proven statistic techniques ensure confidence levels that allow for 'unattended' processing. Enables the processing of higher volumes at lower 'marginal cost'.

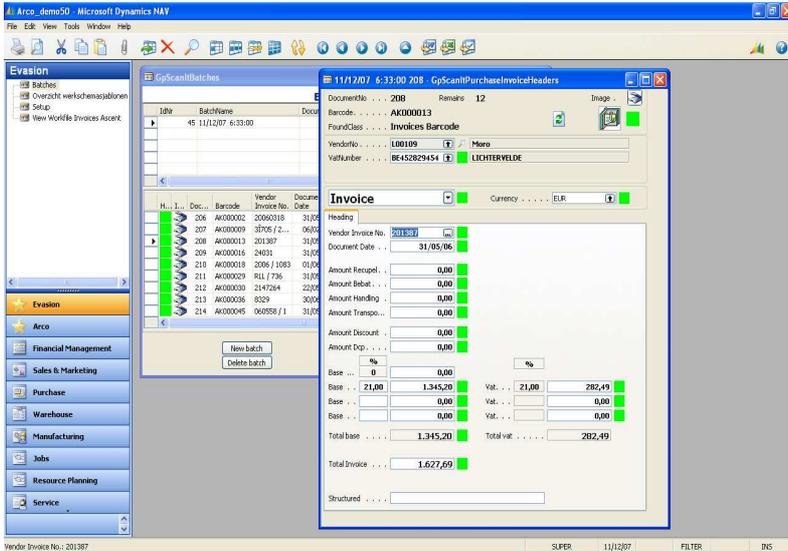

### EVASION nv/sa

Interleuvenlaan 19 ■ 3001 Leuven Belgium

### Powerful extraction

Powerful extraction of key variables without learning. Advanced content analysis supports multiple VAT, additional taxes, rebates, line item recognition and much more. Automatic selection of valid key variables allow for superior 'point and click' learning. Training the system for complex document interpretation requires no technical skills. Productivity is up from the start!

### Advanced Integration

Transparent integration with Navision functionality. Retrieve a digital image of your paper copy everywhere within Navision. Keep efficiency up when dealing with exceptions through an integrated workflow and automated credit note management. Rich 'archiving' functions allow for off-line storage and full text search.

### Return on Investment

Enables you to operate at a whole new level of efficiency and effectiveness. Return on investment covers multiple dimensions as you can increase the number of documents you can process, reduce physical storage space, speed up exception handling and effortless retrieval of all your documents whenever and wherever you would need them.
