Increase your business through e-commerce, using DynaShop

DynaShop makes it easy to expand your Dynamics NAV system to include a webshop. It features all the standard webshop functionality and integrates seamlessly with Dynamics NAV. If required, integration with other webshops is also possible.

With DynaShop you will be in
e-business before you know it!

DynaShop: Full-fledged,
State-of-the-Art webshop
including maximum integration
with Microsoft Dynamics NAV

Maximum Integrated Webshop

Full-fledged, State-of-the-Art Webshop

DynaShop has all the features a contemporary, self-respecting e-commerce solution should have. That's why it has been sold and implemented more than 500 times already. Designed using Visual Studio, the front-end of the webshop is based on Ajax technology and uses a SQL database. Standard templates make it easy to change the overall appearance of your webshop. If you have more advanced layout and design requirements, it can be completely changed to suit.

Integration with Dynamics NAV for Maximum Efficiency

To a large extent, your NAV system and webshop use the same information. Using the integration add-on from IDYN, double entry becomes a thing of the past. All data is entered and maintained in NAV and automatically duplicated in the webshop. In the other direction, new customers and sales orders coming in through the web automatically find their way to NAV.

Base your webshop on an existing NAV implementation and it takes just a few days to be up and running. With Dynashop you will be in e-business before you know it. At a very competitive price!

"DynaShop is the solution of choice for e-commerce with Dynamics NAV: Amazingly complete, easy to implement and yet very attractively priced"

Jos Roelofs, Dynamics NAV partner Dedicato, the Netherlands

Profitable Add-Ons for Microsoft Dynamics NAV

IDYN offers horizontal add-ons for Microsoft Dynamics NAV, which can be used in any NAV implementation, regardless of any other add-ons or customizations. Our products focus on integration, quality, efficiency and ease of use. They are continuously extended and improved, using partners and customers to deliver input.

IDYN products are available to all end users through their Dynamics NAV partners. IDYN consultants provide support to NAV partners and their customers regarding the implementation and day-to-day use of the add-ons. We aim to extend our product offerings in response to market requirements.

Object Manager Advanced

Take development to a higher level

Keep track of NAV objects you change and update. Combine all modifications in a transport and import them in your customer database.

DocEasy

Document management

No more tedious searching for documents. Store everything through Dynamics NAV and retrieve it with ease.

ConnectIT

Business Integration Platform

ConnectIT is a toolbox for all your integration issues. ConnectIT completely opens up Dynamics NAV.

E-Invoice Easy

Electronic Invoicing

For companies with relatively low invoice volumes who want to take advantage of electronic invoicing nevertheless.

PrintIT

Document & E-mail Manager

Use this handy tool to adjust existing documents in Dynamics NAV with ease. Automatically send order confirmations and invoices by email.
