doktool™

Product overview

The Cimbax DokTool™ is an easily deployed documentation tool that will seamlessly integrate Microsoft Dynamics AX to Microsoft Word and Visio. The DokTool™ allows users with no development expertise to right click on a specific AX project and create all of the necessary documentation in minutes.

Key features

· Creates and updates documentation throughout a project.
· Accurately defines the amount of work required to complete projects.
· Screen capture of AX forms to highlight and track changes.
· Creates clear graphical representation of standard AX object models and relationships.
· Full support of AX layers – document single or multi layer projects.

cimbax™

Key benefits

Developer benefits
· Up to 80% reduction in developer documentation time.
· Easy to understand existing configuration.
· Simple to reverse any changes.

Salesperson benefits
· Produce accurate project specifications with minimal developer time.
· Clearly identify what code needs development and what can be left.
· Establish what code can be guaranteed and what cannot.

Customer benefits
· Reduces the time spent generating documentation.
· Greatly increases quality of documentation.
· Accelerated knowledge transfer for developers to your project.
· Reduces overall project costs.

Project Manager benefits
· Drag & drop functionality to customise forms and reports.
· Create high quality technical specifications quickly and easily.
· Close the gap between functional consultants and developers.

Technical details
· Creates full documentation in Microsoft Word & Visio.
· Full support for all MS Word & Visio formatting rules.
· Full support for Microsoft Word templates.
· Create documentation for the objects in a single layer, several layers or from the entire application.

· Automatically create diagrams for AX classes showing relationships & hierarchies.
· Automatic form screen capture.
· Document cross references with filtering.
· Extracts developer's comments from the code and inserts into object / method description documentation.
· The tool can be run from any node and node combination – closed project, open project, group node, or selected nodes.

Supported versions
Cimbax DokTool™ supports the following versions of Microsoft Dynamics AX and Microsoft Office

· AX 2009
· AX 3.0
· AX 4.0
· AX 2.5
· MS Office 2007
· MS Office 2003
