Introduction

This document contains specific installation instructions for Icelandic users performing upgrade of Microsoft Dynamics AX 3.0 Service Pack 5 (SP5) to Microsoft Dynamics AX 4.0 with Service Pack 1 (SP1).

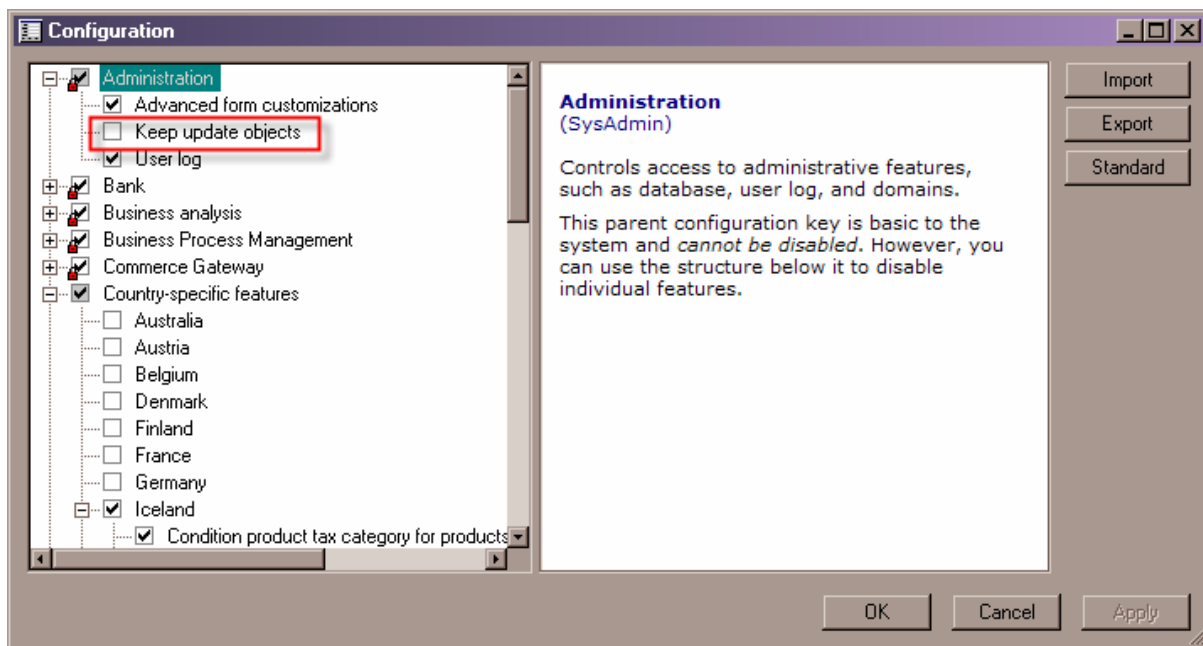

Iceland-specific installation instructions

After preparing the Microsoft Dynamics AX 3.0 SP 5 database for upgrade, complete the following steps to install the Iceland localization of Microsoft Dynamics AX 4.0 with SP1.

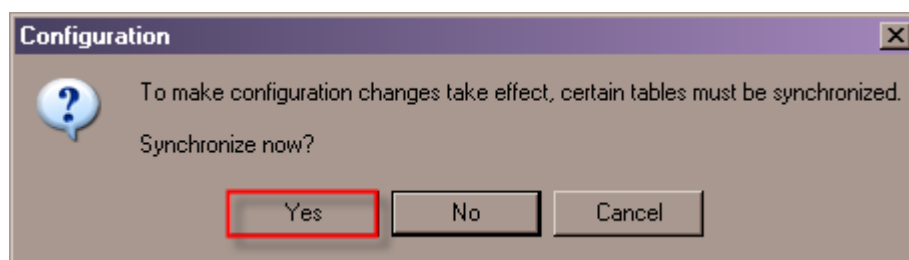

1. Click **Administration** > **Setup** > **System** > **Configuration**.
2. Open the **Country-specific features** folder.
3. Expand the **Iceland** folder, and write down the status of all configuration keys located under it.

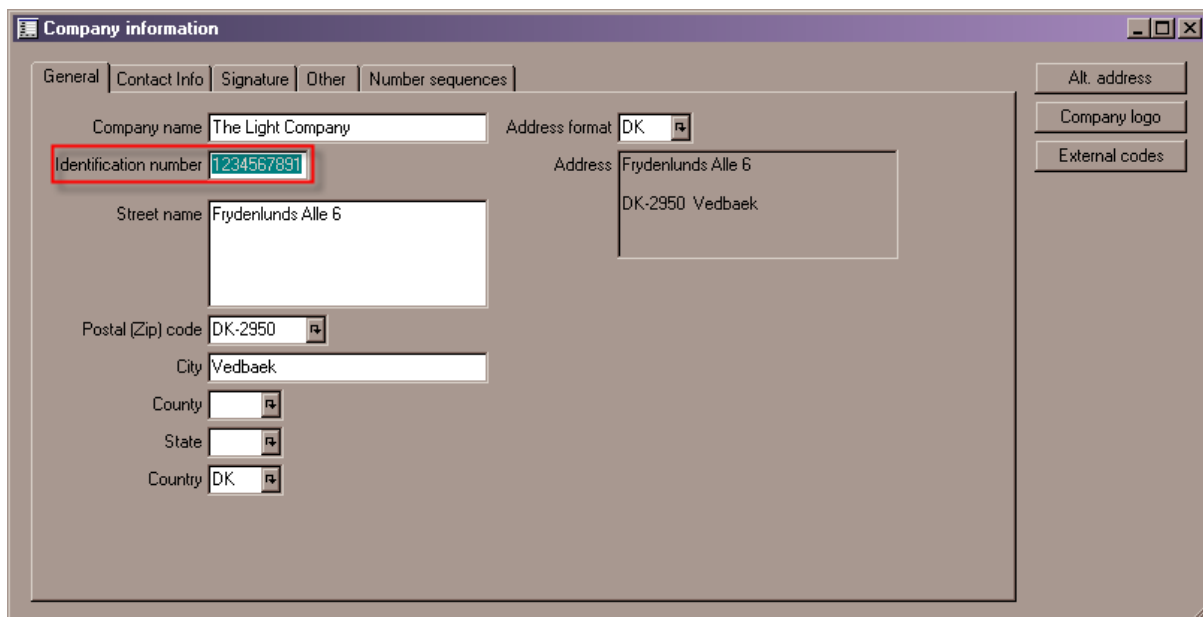

4. Click **Administration** in the same form.
5. Expand the folder and clear the **Keep update objects** configuration key.

6. Click **OK** to save the settings, and then click **Yes** in the dialog box to begin synchronization.

7. Click **Basic > Setup > Company information**.
8. Write down the identification number for all company accounts.

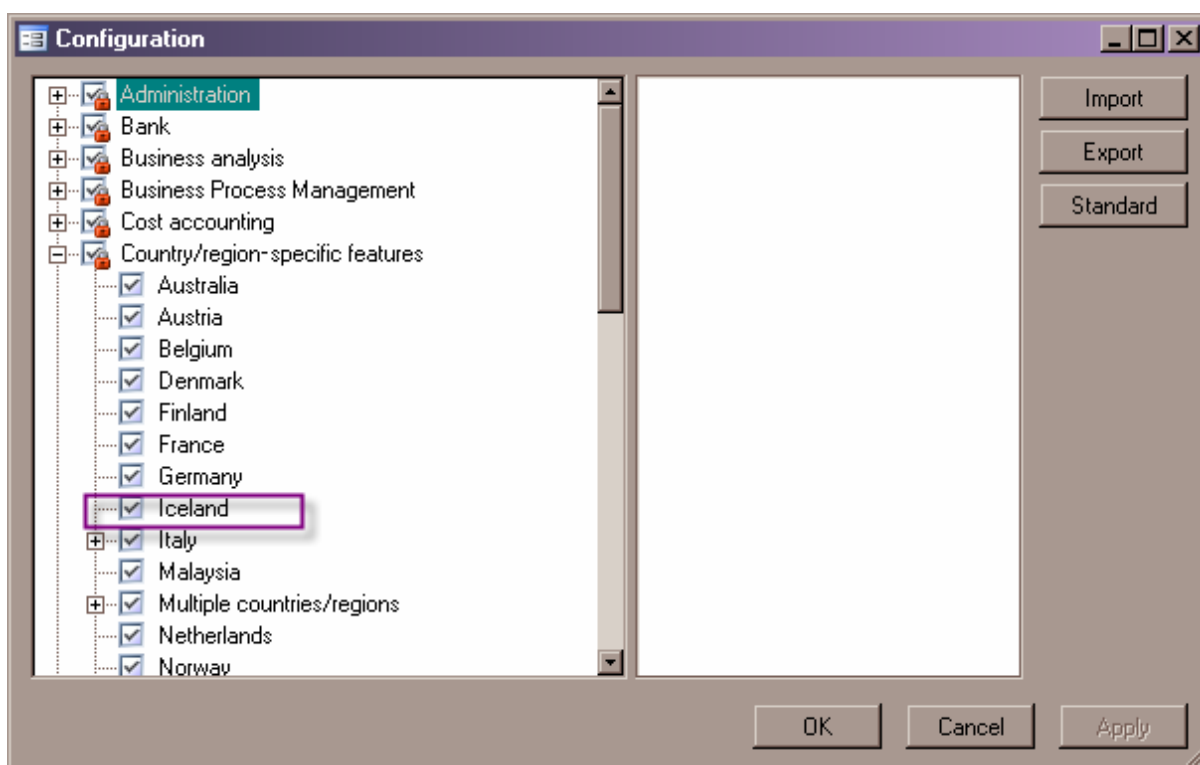

9. Close Microsoft Dynamics AX 3.0.

You are now ready to install Microsoft Dynamics AX 4.0 with Service Pack 1 (SP1) with Icelandic regional functionality.

Follow the general upgrade procedure to transfer data from Microsoft Dynamics AX 3.0 SP5 to Microsoft Dynamics AX 4.0 with SP1 using the **Upgrade Preparation Tool**.

When Microsoft Dynamics AX 4.0 with SP1 is started, the **Upgrade check list** appears and must be completed.

Note: Before running **Presynchronize data upgrade**, verify that Icelandic functionality is enabled in the system configuration (**Administration > Setup > System > Configuration > Country/region-specific features**).

After you complete the **Upgrade checklist**, transfer the configuration key status and identification numbers recorded from Microsoft Dynamics AX 3.0 to the appropriate parameters in each company account of Microsoft Dynamics AX 4.0 with SP1.

Microsoft Dynamics is a line of integrated, adaptable business management solutions that enables you and your people to make business decisions with greater confidence. Microsoft Dynamics works like and with familiar Microsoft software, automating and streamlining financial, customer relationship and supply chain processes in a way that helps you drive business success.
