

Microsoft Dynamics™ AX 4.0 SP1

Sweden release notes

The following release notes are for the Sweden release of Microsoft Dynamics AX 4.0 with Service Pack 1 (SP1).

Local functionality

The local functionality in Microsoft Dynamics AX has been re-structured. For Sweden this means that the WEMEA and Swedish DIS layer have been discontinued. The Swedish features that were available in Microsoft Dynamics AX 3.0 have either been integrated to the Microsoft Dynamics AX 4.0 SYS layer, moved and released in separate GLS Layer, replaced by similar Microsoft Dynamics AX new standard functionality, or discontinued.

Features moved from the DIS layer to the SYS layer

The following features have been moved into the SYS layer. The features are installed when you install Microsoft Dynamics AX and are turned on with the Swedish country configuration key:

- Swedish Tax (VAT) Report
- Payment formats
- SIE export
- EU sales list
- Swedish Zip code import
- Sales order entry statistics
- Multiple interest rates

Note

Multiple interest rates are not located under the Swedish configuration key. They are found in the **Accounts receivable parameters** in the **Interest** section under the **Interest and collection letter** tab (**Account receivable > Setup > Parameters**).

Features that have been replaced

The following features have been replaced by similar features which exist in Microsoft Dynamics AX:

- Financial statement rows
- Periodic accounting
- Ledger account allocation
- Customer Payment – Invoice button

Features moved to a separate GLS layer

The following features have been placed in separate GLS layer to be released separately on PartnerSource (Note - you can only have one GLS layer per installation):

- Price calculation
- (SIS) External Documents

Features that have been discontinued

The following features have been discontinued:

- Create OLAP files (New OLAP model in 4.0)
- Report changes in: Customer/Vendor account statement, Payment proposal (discontinued because of integration design issues with Microsoft Dynamics AX)
