

Microsoft Dynamics™ AX 4.0 SP1

Hungary release notes

The following release notes are for the Hungary release of Microsoft Dynamics AX 4.0 with Service Pack 1 (SP1).

Miscellaneous charges on Hungarian invoice format not printing

The total amount that is listed on an invoice is not equal to the sum of VAT amounts in the line, because the invoice total includes a VAT for miscellaneous charges that are not listed on the invoice.

Reporting features are not complete

The Intrastat and EU reporting features for sales and purchases are not complete. The functionality for Microsoft Dynamics AX 4.0 with SP1 is the same as Microsoft Dynamics AX 3.0 with SP5.

Petty cash functionality has been replaced

The petty cash functionality has been replaced with a new petty cash solution in Microsoft Dynamics AX 4.0 with SP1. You can activate the petty cash functionality by clicking **Administration > Setup > System > Configuration**. Select the **General Ledger** configuration and select the **Petty cash** check box.

Bilingual invoices have been removed

In accordance with §166 of the Hungarian Accounting Law, which took effect January 1, 2006, the English/Hungarian bilingual invoice labels have been changed to display labels for only the currently-set language on selected reports.
