

# Microsoft Dynamics™ AX 4.0 SP1 Finland release notes

---

The following release notes are for the Finland release of Microsoft Dynamics AX 4.0 with Service Pack 1 (SP1).

## Local functionality

In Microsoft Dynamics AX the local functionality has been re-structured. For Finland this means that the Finnish DID layer has been discontinued and the Finnish features have been moved to the SYS layer.

To enable the features, you still have to enable the country configuration key for Finland. Compared to Microsoft Dynamics AX 3.0 there are no changes to the Finnish features (no local features have been added and no existing features have been changed).

## Customization needed with Printed Bank Bar code card

As in Finnish Microsoft Dynamics AX 3.0, the Printed Bank Bar code field is an issue and needs to be customized to be read properly by bar code readers.
