

Microsoft Dynamics™ AX 4.0 SP1

Norway release notes

The following release notes are for the Norway release of Microsoft Dynamics AX 4.0 with Service Pack 1 (SP1).

Local functionality

In Microsoft Dynamics AX, the local functionality has been re-structured. For Norway this means that the WEMEA and Norwegian DIS layer have been discontinued. The Norwegian features that were available in Microsoft Dynamics AX 3.0 have either been integrated to the Microsoft Dynamics AX 4.0 SYS layer, moved and released in separate GLS Layer, or discontinued.

Features moved from the DIS layer to the SYS layer

The following features have been moved into the SYS layer. The features are installed when you install Microsoft Dynamics AX and are started with the Norwegian country configuration key:

- Multiple interest rates
- Norwegian sales tax report
- Payment terms on collection letter
- Form layout of documents
- Giro money transfer slip on collection letter

Features moved to a separate GLS layer

The following features have been placed in a separate GLS layer to be released separately on PartnerSource (Note - you can only have one GLS layer per installation):

- OCR Payments
- Electronic payment of vendors
- Avtalegiro
- eInvoice (eFaktura)
- eGiro
- File archiving

Features that have been discontinued

The feature MultiCompany has been discontinued.

Potential Upgrade Data Loss in AssetTable Fields

If you use the TaxCountyNO, SubventionNO, SubventionTaxFreeNO, AssessmentNO, AssessmentTaxNO, AcquisitionValueNO, ValueAt19840101NO and ReturnOnInvestmentsNO fields in the AssetTable table in Microsoft Dynamics AX 3.0, but did not have the configuration key for Norway (CRSENorway) set to active, you will lose the data in these fields when upgrading to Microsoft Dynamics AX 4.0. These fields are only available in Microsoft Dynamics AX 4.0 when the configuration key for Norway is active. To avoid this problem, back up your Microsoft Dynamics AX 3.0 database, and after upgrading, import the data from these columns to another column.
