

Navutilus Deploy

UtilitiesOnly™ for Navision® Users & Developers

Powerful & handy tool

Save time & money with Navutilus implementation methodology.

Navutilus Deploy is very effective tool when you need deploying your functionality to your customers with following useful properties:

- To provide customers with specifying the Microsoft Dynamics NAV object IDs they find preferable for them when they install your functionality to their system and to be sure at the same time that the references from these objects to each other remain consistent.
- To supply the activation key for your Microsoft Dynamics NAV functionality the customer can enter when installing this functionality.
- To have the Microsoft Dynamics NAV objects being installed with the source code removed.
