SD Maintenance Manager [SD-MAIN]

SD Maintenance Manager for Microsoft Dynamics NAV offers a CMMS solution (Computerised Maintenance Management Software) that can manage all processes in the maintenance cycle of an asset. Plan for efficient maintenance processes, to offer increased reliability. Drive improved stock management to reduce costs and track all planned, current and historical activity for you plant and assets.

Maintenance Asset Control

- Hold plant/asset history
- Hold detailed service details and instructions
- Set scheduled maintenance tasks

Maintenance Works Orders

- Create Planned based on timelines or plant meter readings
- Create Requested based on employee requests
- Create Break fix based on reported breakdowns
- Assign each to scheduled rosters and log the

Maintenance Parts Control

- Hold service kit records
- Monitor service parts stocks
- Replenish parts based on safety stocks from preferred vendors
- Log serial tracked components into main assets

Why Use SD Maintenance Manager

Track Plant and Asset history, service plans and actual service events.	Manage works orders for Preventative, Scheduled, Requested and break down events	Control your maintenance parts stocks. With replenishment and serial tracking	Rapid deployment with no impact on existing setup	Certified for Microsoft Dynamics NAV
