

- Reduce printing and postage costs
- Decrease administration overheads
- Quicker document delivery
- Consistent professional correspondence
- Auto archiving of electronic copies

Document Sending and **Document Sending⁺** are fully integrated Microsoft Dynamics NAV add-ons providing the ability to send NAV documents via multiple formats **quickly** and **efficiently**. Documents can be sent to multiple recipients saving valuable working time.

Document Sending⁺ can send unlimited attachments to include Terms and Conditions, order acceptance forms etc. An HTML capability and integration with Segments provide **sophisticated** and **professional** correspondence at all times.

Document Sending integrates seamlessly with existing Microsoft Dynamics NAV systems leading to a dramatically reduced installation time and cost. As a result the impact on day to day operations is minimal, allowing organisations to carry on with business as usual.

The user interface comfortably aligns with the usual Dynamics appearance and functions, meaning the end users can acclimatise to the system without an extra learning curve. The interface has a wide range of features covering a variety of document delivery scenarios whilst maintaining ease of use.

Feature	Document Sending	Document Sending*
