

CUERO DYNAMIX

An End-to-End Solution for Apparel, Textile and Footwear Companies

Why is Cuero Dynamix your Best Solution ?

The Indian leather industry produces a wide range of products from raw hides to fashionable shoes, jackets, belts, bags, etc, and thereby spans both, the formal and informal sectors, Firstware Software Solutions has developed a platform that will enable the leather industry, across both sectors, to work with modern day technology and expand business profitably while maintaining high standards of productivity and service.

Challenges faced by the Industry

- Management of Color and Size-wise Bill of Material (BOM) and Routing
- Demand Capturing (Color and Size-wise), Inventory Tracking and Location-wise Visibility
- Tracking of Items with different Units of Measure (UOM)
- Initial product costing to generate quotes
- Sample and Sales Order Tracking
- Allocation of Job works (Subcontract Process)
- Planned versus Actual Production Cost
- Resource-wise Productivity
- Order-wise Profit Analysis
- Packing based on Customer Preferences
- Order Quantity / Ratio based packing

The Cuero Dynamix Advantage

- Easy configuration of BOM / Routing (for combination of Style, Color, Size etc)
- Simple overview of the production process made possible by accurate planning, MRP (Material Requirements Planning) and MPS (Master Production Scheduling)
- Cost Sheets collate the break-up of the initial product cost in order to easily generate quotations with different versions
- Easy processing of sample orders for diverse samples
- Effective tracking of Items with Multiple Units of Measure i.e. sq ft, pieces, etc.
- Auto generation of the pre-packaging list based on the packing preference i.e. 'Solid Colour/Solid Size' or 'Solid Colour/Assorted Size'
- Batch-wise tracking of Finished goods and Raw Materials
- Allocation of Job works (Sub-contracting)
- Gantt chart and drag-and-drop functionality to reschedule individual processes
- Enhanced Manufacturing and Sales

The freedom to focus on your business

Enabling Effective Business Management with Microsoft Dynamics

Microsoft Dynamics is a line of integrated, adaptable and upgradable Business Management Solutions that enables the Organization to make business decisions with greater confidence. Microsoft Dynamics works like and with familiar Microsoft Products. Integrating Finance Management, Inventory, Planning and Manufacturing in a way that helps the Organization to implement state-of-the-art Business Intelligence.

Cuero Dynamix can be deployed for the following segments of the Leather Industry:

- Tanneries
- Leather Footwear / Garments/ Goods Manufacturers
- Agents, Traders and Distributors of Leather and Leather Products
- Suppliers of Chemical, Machinery and Accessories for the Leather Industry

The freedom to focus on your business.

Key Features

Merchandising

Cost-effective solution for management of merchandising, right from capturing enquiry details, generation of cost sheet for creating quotes, processing of Sales Orders and Demand capturing in a multi-dimensional matrix

Sampling

Easy management of Sampling by pre-orders like development sample, photo sample, salesman sample and post orders like pre-production sample, production sample etc., along with various sample types and tracking them across the sample production system

Inventory

This functionality is oriented towards the purchase of Leather skin, inventory, movement of goods in multiple units of measure i.e. pieces, Sq.ft, DCM, etc.

Instant visibility of the entire Inventory Management processes and tracking of independent and dependent items throughout the system based on product attributes i.e. colour, size, width, etc.

Planning

Real-time material planning based on the variant-wise Bill of Material and routing that allows efficient and accurate planning that is synchronized with procurement, production and transfers between locations, leading to a reduction of inventory buffer stocks before replenishments

Manufacturing

Accommodates any number of configurable attributes like colour, size, width, etc., through variant builder

Colour, Size (variant wise), BOM and Routing enables proper planning, processing and tracing of materials with high level of visibility, thereby giving better control across the leather apparel and footwear supply chain.

Packing

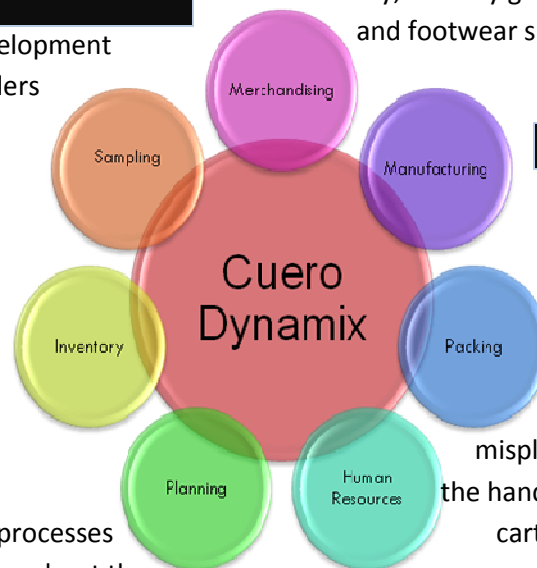

Captures packing information that helps in determining the preference from customers.

Solution has salient features to fit for ratio, assortment-wise packing and packaging. Thus

indeed provides input for preparation of an advance packing list to pack goods without misplacement in cartons. The Solution also addresses the handling of multilevel packing like Master box, inner carton box, outer carton box, etc.

Human Resource Planning

Accurate employee records are essential for Human Resource Management. The Organization can maintain comprehensive employee records, keep track of employee skills, measure the productivity of the employees on the basis of which incentives can be determined.

The freedom to focus on your business

Key Benefits

Material Planning and Control

Aggregate production planning, routing and the most recent data help in precise estimation of inputs. This cuts down wastage, shortens time-to-market cycles. Integrated system ensures accurate tracking of material usage against procurement plan order-wise and inventory control

Work-in-Process Monitoring

Efficient tracking of work-in-process against the customer confirmed order used to track shipment schedule, costs and budgetary variances

Reduce costs

Better inventory control reduces costs by optimizing inventory levels, reducing the procurement time-line and preventing overstocking

Reduce Cycle Time

Reduced production cycle time, supports build-to-order, engineer-to-order and build-to-forecast

Integrated Collaboration

Optimal utilization of resources by the effective streamlining and integration of customer service, design, sampling merchandising, production, distribution & financial processes

Capitalize on Global Opportunities

Designed so that new sites, languages, currencies and local functionality can be easily enabled, allowing your company to take advantage of the global market place.

Accurate Estimation and Waste Reduction

End-to-end integration of company data, aggregate production planning, routing and the most recent data help in precise estimation of inputs, leading to cutting down on wastage, shortening time-to-market cycles for new collections

Streamline Business Processes

Automates routing business processes, integrates data across the company and facilitates an effective work flow to help streamline your business processes and improve efficiency

Make Effective Business Decisions

Instant and complete overview of your business for production orders and inventory levels to customer status and marketing campaigns. Business and Financial reports are always up to date and fully integrated with information from all other areas in the program
