

Become the leader in the Fashion IT market by offering the solution that fits the needs of both the midmarket as well as the small business market.

As a VAR focusing on the fashion industry, there is a new product in the market that meets not only the needs of fashion companies but also turns the VARs selling and implementing the solution into successful businesses.

Introducing itSuitsFashion which:

- comes at a price point which opens up opportunities to serve the small business market
- is a perfect fit for all mid market fashion companies
- due to the unique cost level of the solution is suitable for companies with limited IT budgets
- is a specialized solution for the fashion industry built with 80 years of fashion and NAV experience. This is our expertise and we want to help you succeed...

All in all itSuitsFashion enables you to become the leader in Fashion IT solutions in your local market.

“Specialized solution for the fashion industry built with 80 years of fashion and NAV experience!”

Certified for Dynamics

itSuitsFashion is Certified for Dynamics NAV, proving the quality of the solution development and recommendations of end-users. itSuitsFashion has been developed by Fashion IT experts, who have put nearly 80 man years of experience and expertise in the efficient creation of this high quality solution.

Efficient development enables competitive pricing

By also keeping the end-users and resellers needs and demands in mind, itSuitsFashion has become a mature, yet slender solution, without excess functionality that needs to be paid for, as is often the case with older solutions. This way you can benefit from reaching a larger market by offering your customers a great solution at an even better price, thus closing more deals.

Easy upgrades

itSuitsFashion covers all aspects of your customers company processes and fulfills its employees needs. Yet it is a compact solution, enabling you to easily upgrade your customers.
