# Dynamics NAV Addons

User Session Control

Auto logs off idle Microsoft Dynamics NAV users and limits user logins per User ID.

- **No More Wasted Sessions**
- **Have Control Over Your Users**
- **Optimize Your User Licences**

User Session Control allows companies running Microsoft Dynamics NAV to make best use of their User Licenses in two ways:

- The system will automatically disconnect any user who is "idle", or hasn't been working on the system, for a certain period of time. No more running out of user licenses when people forget to log out!

- Users often open up Microsoft Dynamics NAV multiple times, taking up valuable user licensces. Administrators can limit the number of times a User logs on to Microsoft Dynamics NAV.

The User Session Control add-on allows Global Setups of the Maximum Login and Maximum Idle Time paramaters.

Global Setups

There are user-by-user setups for more control and flexibility which override the global settings. In addition, you can exclude some users from getting disconnected.

Setup Per User – Overrides the Global Setups

Versions: 4.x, 5.x
